

Alpesh R. | M.Tech

Certified Magento Developer & AWS Certified

(Experience 11 Years)

ABOUT ME

Founder and Principal DevOps & Cloud Infrastructure Engineer with 11+ years of experience designing, deploying, and managing production-grade infrastructure for SaaS platforms, ERP systems, eCommerce applications, and IoT solutions. Strong expertise in AWS cloud services, Linux server administration, CI/CD automation, containerised deployments, monitoring, security hardening, and large-scale data storage. Proven experience managing **200 TB+ of cloud data** with cost-optimised and reliable storage architectures. Previously AWS Certified with extensive hands-on cloud experience.

SKILLS

Cloud & Infrastructure: AWS (EC2, S3, IAM, CloudWatch), DigitalOcean, Linux (Ubuntu, CentOS), High availability & scalability planning

Large-Scale Data Management: AWS S3 (**200 TB+ managed data volume**), Object storage architecture, Lifecycle policies (hot/warm/cold tiers), Storage cost optimisation & forecasting, Retention, archival & cleanup automation, Secure bucket access & IAM policies

Containers & Deployment: Docker, Docker Compose, Containerised application deployments, Environment separation (dev/staging/production)

CI/CD & Automation: GitHub Actions, Automated build, test & deployment pipelines, Rollback & minimal-downtime deployments

Web & Application Servers: Nginx, Apache, Reverse proxy & load balancing, SSL configuration (Let's Encrypt)

Monitoring, Backup & Security: Log management & alerting, Uptime monitoring, Automated database backups, Disaster recovery planning, Firewall rules, SSH hardening, patching

EMPLOYMENT HISTORY

Principal DevOps / Cloud Engineer (2018 to till now).

Senior Web & Infrastructure Engineer (2012- 2017)

CERTIFICATION

Adobe Certified Expert – Magento Commerce

<https://www.certmetrics.com/adobe/public/verification.aspx>

Verification Code: RBM0C8FCKFVQQGWV

AWS Certified Solution Architect Associate

<http://aws.amazon.com/verification>

Verification Code: Z0JMLECKJBR1QE9B

Key DevOps Project

Large-Scale Object Storage & Cost Optimisation Platform

Architected and managed cloud object storage handling **over 200 TB of production data**. Designed lifecycle policies to tier data based on

access patterns, automate archival of inactive datasets, and enforce retention rules. Optimised cloud storage costs while ensuring availability, security, and compliance.

OJSCloud – SaaS Platform DevOps Operations

Managed DevOps and cloud operations for a multi-tenant SaaS platform providing journal hosting and publishing services. Implemented automated deployments, SSL, monitoring, backups, and scalable storage using AWS S3 with lifecycle-based cost optimisation.

IoT Solar Light Monitoring Infrastructure

Designed and maintained infrastructure for an IoT solar light monitoring system. Deployed containerised backend services and dashboards, implemented monitoring, backups, and secure access. Managed object storage for logs, reports, and historical device data.

CI/CD Automation Framework

Implemented automated backup strategies, including database dumps, cloud snapshots, and periodic restore testing. Strengthened infrastructure security through firewall configuration, SSH hardening, and access controls.

EDUCATION

M.Tech In Web-Technologies (2010-2012)

Gujarat University, INDIA

B.E. in Computer (2006-2010)

North Gujarat University, INDIA
